System KOMFORT LINE K-3 SMART&QUICK

SMART&QUICK is an updated KOMFORT LINE K-3 window hardware system of AXOR INDUSTRY company.

AXOR design engineers set themselves the goal of improving this line of hardware and making it even more versatile and convenient to use. As a result, we got the updated Komfort Line K-3, which provides even higher assembly speed, but completely preserves its basic characteristics: comfortable operation, high quality and safety for end users.

The main advantages of updated **K-3 SMART&QUICK**:

- The changed face plate provides a higher rigidity of the profile section, which increased its bending resistance, and the flawless appearance will satisfy even the most demanding consumers;
- The increased linear dimensions of gears and stay arm allow PVC window producers use cutting tools (punching machines) for both straight and eccentric cuts when installing hardware;
- Better connection of gears and stay arm with corner transmission due to location of the driving rod 0.25 mm lower;
- Locking pins are located 0.25 mm lower, which will improve the operation of hardware set with micro ventilation and safety locking plates;
- The presence of corner transmissions for eccentric cut will significantly facilitate the work of PVC window producers.

SMART&QUICK is the constant quality of AXOR Industry products, speed of assembly and versatility in using.

Application range

All window furniture in our catalogue is intended exclusively for the internal opening of windows and balcony doors.

The system K3 has been provided in such assemblies as, tilt and turn opening, single turn opening, single tilt opening and double sash opening as well.

Hardware elements

All sets of hardware, which were indicated in this catalogue, must consist only from original elements of AXOR INDUSTRY. Otherwise the producer won't be able to guarantee the work of hardware properly.

So, for each type of a sash, it is possible to set optional elements for additional functionality of one. These elements were marked with following colors:
Red – base safety;
Grey – possible equipment.

Quality

All products of AXOR INDUSTRY corresponds according to technical norms of DSTU Б В.2.6-39:2008, EN 13126-8 which regulate the main requirements of tilt and turn hardware.

Assembly

So, for accurate an assembly and for further correct work of hardware it is necessary to follow instructions of this catalogue.

Fixing of details:

The handle with screws M5 x 40mm.

The elements of a sash and the locking plates: self-tapping window chromated screws 4,0 x 25 mm or 3,9 x 26 mm.

The elements of hinges group: galvanized or alternatively chromated screws with flat head and cross-shaped slot, DIN 7982 3,9 x 32 mm or 3,9 x 38 mm.

Preliminary drilling is necessarily for these screws. Perforation instead of drilling is forbidden. Drill diameter for PVC profiles is 0.7, and for steel profiles is 0,8 diameter of a screw.

Settings of electric- or pneumatic screwdriver: maximum torque is 2.5 Nm, rotation speed: max 600 - 1000 rpm.

In case of non-compliance of these catalogue's recommendations for assembly and exploitation, the producer AXOR INDUSTRY cannot guarantee properly work of separate elements, as well as, the work of hardware system in whole.

The AXOR INDUSTRY Company reserves the right, in a process of further an improvement and development, to make technical changes of product KOMFORT LINE K-3, and also to change packaging norms.

Locking pins

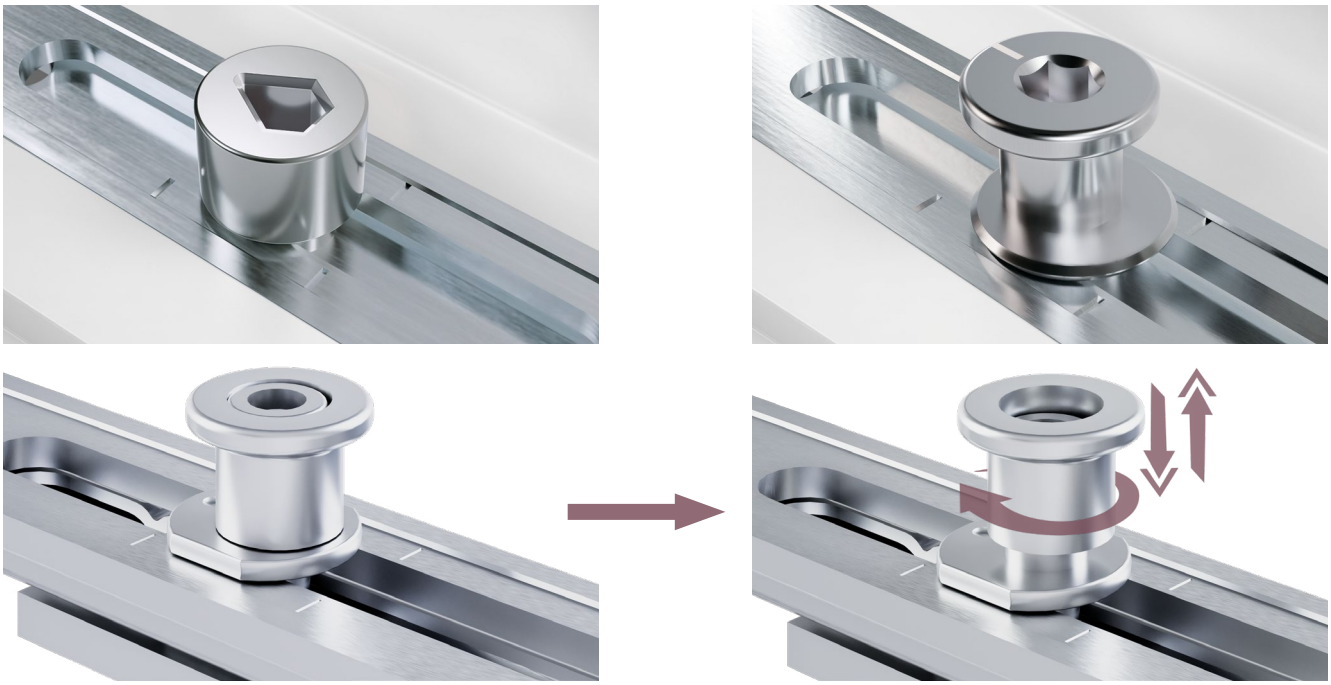

Locking pins

The system of window hardware KOMFORT LINE K-3 SMART&QUICK was equipped with cylindrical pins of sliding.

Thus, as additional option it is possible to complement elements of a sash with a mushroom pin, to conform the base safety level according to AhS Standard. Or the FL-AX anti-burglary pin, which adapts to the telescopic plate thanks to the possibility of linear displacement and rotation around its own axis.

In order to ensure air and water permeability of window and balcony door units in accordance with the DSTU Б В.2.6-39:2008 standards, the construction of turn, tilt and tilt&turn devices shall ensure that the contact between the sash (leaf) and the frame remains tight and even for the entire duration of service life, based on recommendations from the profile system manufacturers, the use of a certain type of gasket and observance of the required size of gap under the gasket, which means that when assembling a tilt-and-turn (turn) window, the manufacturer must receive recommendations regarding the number of and the distance between the locking points directly from the profile manufacturer, in writing and with the explanation of these requirements.

The adjustment range of locking pins is +/-1 mm. The diameter of pins is 11 mm.

Technical features

There is an opportunity to fix the finger of the corner bearing at the extreme bottom position under angle 180° in order to make an assembly more comfortable by a screw gun, so the finger is not falling down and hindering to screw the screws.

3) The holes of the corner bearing and stay arm bearing were designed thus all screws to pass through reinforcement profile inside of a frame.

4) The drill-in corner hinge has two pins following sizes: length 5 mm and diameter 3 mm to fix reliably this one before the moment of screwing by screws.

5) There is a plastic bush, of high-strength polymer, Inside of the drill-in corner hinge, which prevents unscrewing of an adjustable screw during the turning of a sash. Thus there is not any creak during of the turning of a sash. The adjustable screw of the drill-in corner hinge was fixed primordially in the central position to exclude unscrewing during transportation and exploitation of end product.

6) The finger of the stay arm bearing gets the hard and reliable fixation thanks to a special bush of high-strength polymer, excluding the disconnection by itself.

7) The antitheft locking plates with mushroom pins of the corner transmission and middle lock together allow equipping a window according to requirements of the base safety according to AhS Standard.

8) The wrong operation safety device with sash lifter is universal for left and right opening. There is a fixation of the central position before a moment of assembly. It can work even the gap between the frame rebate and sash rebate is from 10,5 till 14 mm. Thus, if it is necessary there is an opportunity to adjust a lifting plate at +/- 1 mm by height. So, the setting of the lifting pate with a special telescopic jig provides the correct work this wrong operation safety device whole.

9) The bottom extension has "a ski-lift" which was integrated to this one, thus it excludes the sagging down of a sash when it is closed.

10) The junction of the middle lock to the stay arm is quite reliably thanks to a screw, which joins these ones.

11) The adjustment range of the stay arm by a gasket pressing is +/- 1 mm.

12) There are five types of middle locks thus, it is quite useful for an optimization of a warehouse and for logistics too.

Protective plating of KOMFORT LINE K-3 SMART & QUICK

The protective plating of KOMFORT LINE K-3 SMART & QUICK

The quality of the plating of all hardware's elements affects at the work of accessories, durability and surface appearance very much.

Thus, the special technology of galvanizing allows getting the high-quality plating, which provides all elements of KOMFORT LINE K-3 required level of protect against corrosion.

Nevertheless, a silver color of the hardware's surface appearance fulfills a decorative function to allow it to combine successfully with the others elements of a window.

The causes to appear the corrosion at hardware's surface.

1) The prolonged exposure of high wetness (more than 70%).

2) The polluted air with gas, comprising a connection of various acids, and an exposure of salt-mist.

3) The mechanical damages of surface during an assembly or maintenance, which disrupt wholeness of the plating.

4) Some cleaning agents include alkali, acid and so on.

5) Under the influence of different temperature there can appear the formation of condensate at the surface of hardware.

6) The pollution with some building materials, in particular by cement or gypsum plaster.

Some instructions to keep the quality of surface plating

1) Avoid hits of building materials at the hardware surface, for example plaster, cement, different building solutes and building dust.

2) Avoid any exposure of aggressive acidic steam and salt-mists at the hardware surface.

3) Do not use any rubber gasket, which is able to soaks up and to hold some moisture.

4) The cleaning should be made with pH-neutral solute, before diluted.

5) Do not permit any mechanical damages of the hardware's surface by building, assembly and detergent instruments.

Storage conditions

This applies to storage and transport, as well as for unloading and loading procedures. Where appropriate, plastic protective sheets or similar are to be used during outdoor transport when raining (i.e. on-site transport). Storage may only be carried out in suitable, closed rooms and not outdoors. Condensation is to be absolutely avoided during the entire transport and storage duration.

1) Always keep the hardware boxes closed, and always cover up hardware boxes which were opened and do not put boxes directly on the floor.

2) Transport the hardware always with suitable devices (if possible on pallets with stretch film).

3) The components may not get wet. The packaging must remain dry (it is recommended: Warehouse temperature – 15-25˚C; Relative humidity – less then 50%).

4) If box becomes wet please immediately unpack the components from the wet bundles, dry the components and check for signs of corrosion. In any case repack the usable components when dry with new packing material.

Representation of the information

All article numbers in this catalogue were afforded an alphanumeric form. The decipher of all article numbers you can find at the pages 8-9.

Thus, all sizes which were shown in that catalogue are nominal and contain general tolerances.

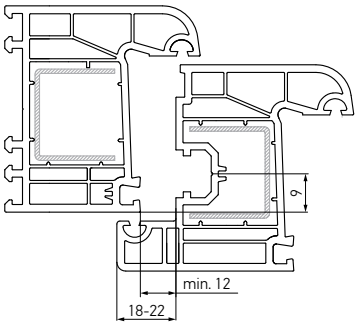

All sizes were confered in mm.

The information about restriction of sashes' sizes should be taken from diagrams of this catalogue or a user's guide.

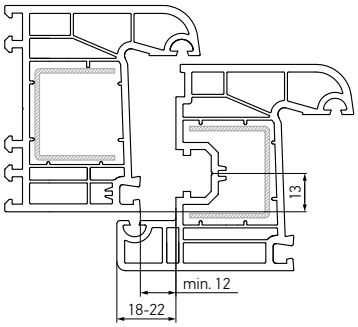

Section of PVC profiles for single sash and double one

The single sash constructions

Sash rebate gap (A): min. 12 mm
Sash overlap (C): 18 – 22 mm
Sash groove position (B): 9 mm

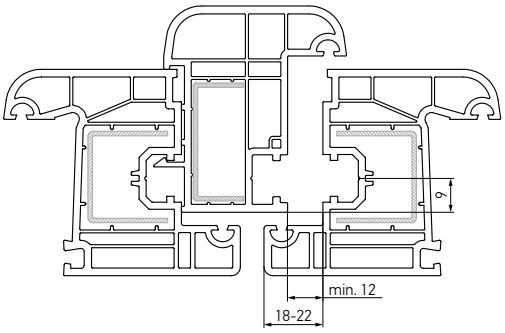

Sash rebate gap (A): min. 12 mm
Sash overlap (C): 18 – 22 mm
Sash groove position (B): 13 mm

The double sash constructions with opposite hardware groove

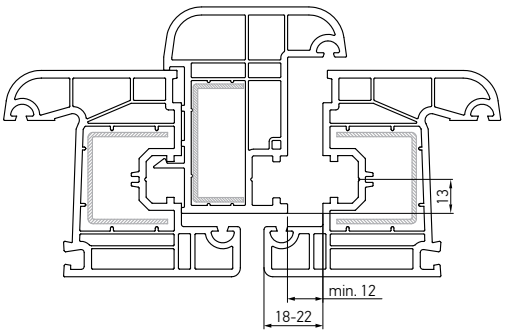

Sash rebate gap (A): min. 12 mm
Sash overlap (C): 18 – 22 mm
Sash groove position (B): 9 mm

The handling of a passive sash with double sash's gears K1002-XX-N03

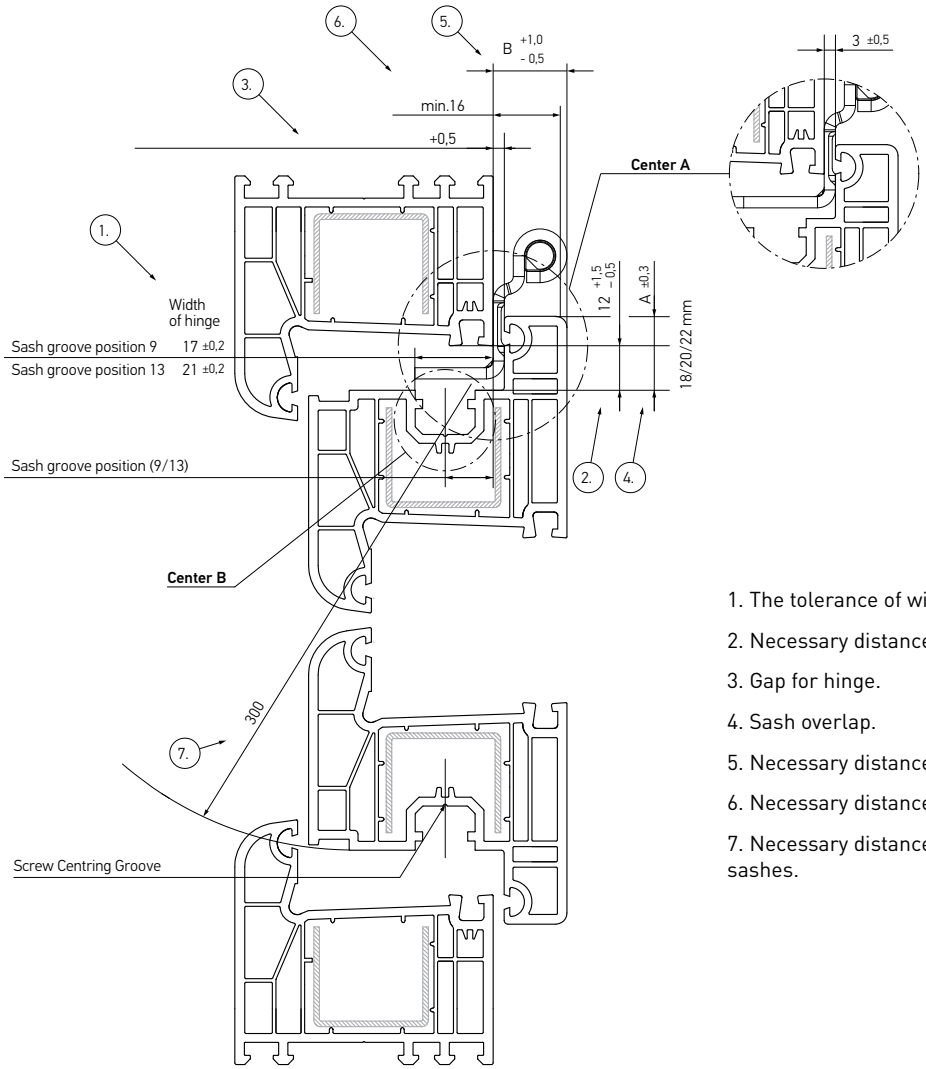

Sash rebate gap (A): min. 12 mm
Sash overlap (C): 18 – 22 mm
Sash groove position (B): 13 mm

The handling of a passive sash with double sash's gears K1002-XX-N03

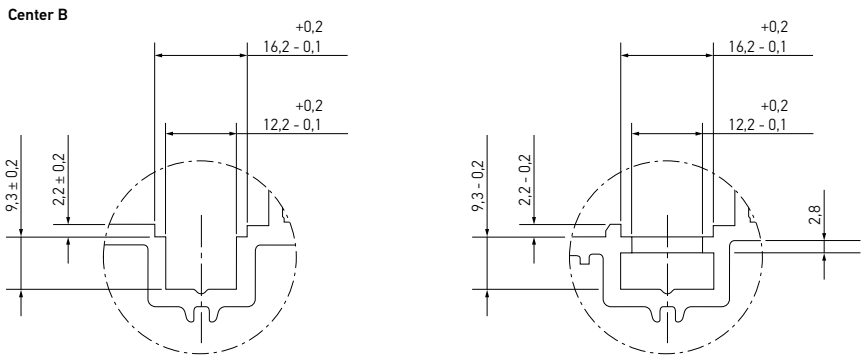

The information about profile-depending elements you find at the profile list

Recommendations for profile design – PVCu windows

1. The tolerance of width for top sash's hinge.
2. Necessary distance for moving the hardware.
3. Gap for hinge.
4. Sash overlap.
5. Necessary distance for the clamping of gasket adjustment.
6. Necessary distance for inserting a hinge into sash overlap.
7. Necessary distance for operation of small turn and tilt-turn sashes.

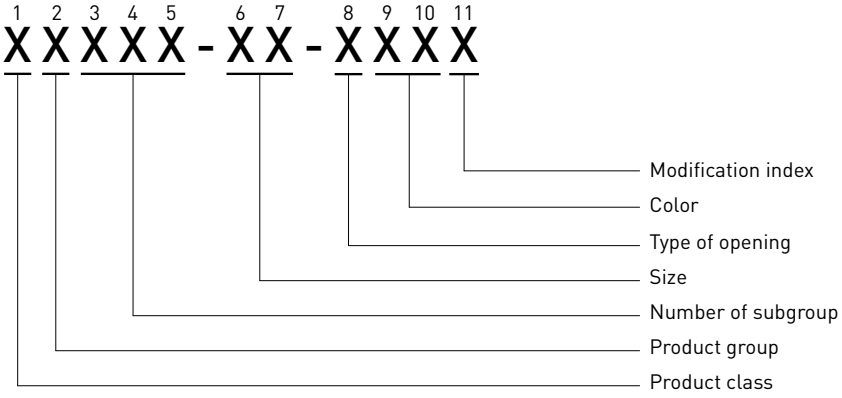

Dimensions for plastic profile according RAL as of February 1998.

Offerstr. 12, 42551 Velbert

Article structure

Article structure

1. Product class (1st sign)

XXXXX-XX-XXXX

"S" – smart line

"K" – komfort line

"A" – element refers to both classes

2. Product group (2nd sign)

x**X**XXX-XX-XXXX

"0" – alternative value

"1" – gear variable

"2" – corner transmissions

"3" – stay arm

"4" – extensions

"5" – hinges

"6" – standart locking plates, tilt locking plates

"7" – locking plates and the other accessories

"8" – alternative value

"9" – alternative value

3-5. Subgroup number (3rd, 4th, 5th sign)

xx**XXX**-XX-XXXX

Additional information about product's subgroup.

Example: group "gears", subgroup "double sash lever espagnolette variable".

6-7. Size (6th, 7th sign)

XXXXX-**XX**-XXXX

Important dimensions of the product such as the length of the axis, etc.

8. Type of opening (8th sign)

XXXXX-XX-**X**XXX

"N" – universal

"R" – right

"L" – left

9, 10. Color and plating (9th and 10th sign)

XXXXX-XX-X**XX**X

The ninth symbol indicates the color hue:

0 – basic color. For example, RAL9016 is the basic for white color, it is indicated by the code **0**1; RAL8022 is the basic for brown color – **0**2, etc.

1 – additional color. For example, RAL8019 for brown color – **1**2.

2...9 – following additional colors.

The tenth character indicates the color:

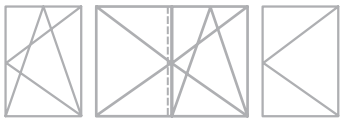

0 – plating	4 – champagne	8 – steel surface
1 – white	5 – gold	9 – special colors
2 – brown	6 – bronze	
3 – silver	7 – black	

By default, all surfaces are glossy and this is not indicated separately in the article. Matte surfaces are marked with the letter **M** after the 10th symbol.

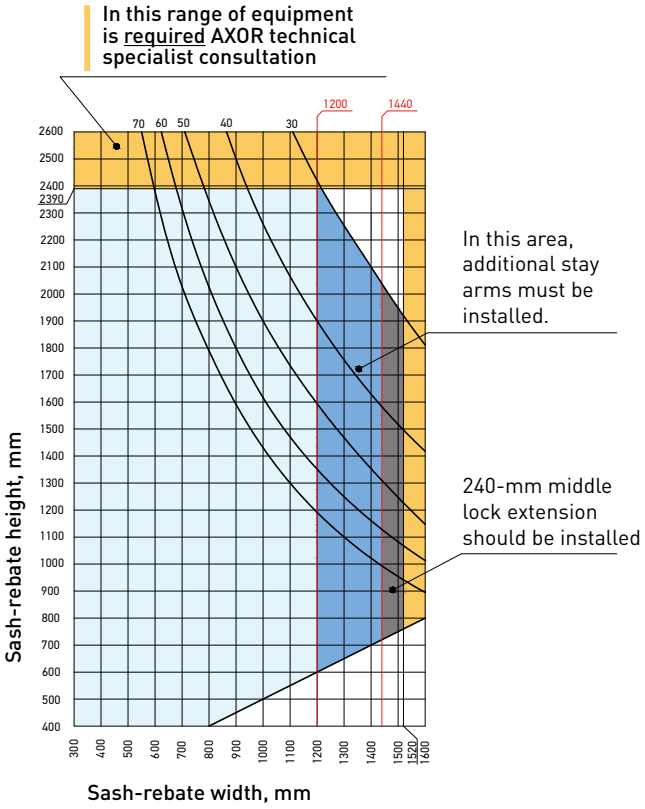

11. Modification index (A, B, C) (11th sign)

Maximum sash weight is 50 kg

Incorrect using and safety

Safety conventional symbols

Conventional symbol	Meaning
	**Danger of injury through trapping of body parts** • Never reach into the opening between the sash and the outer frame when closing windows/doors.
	**Risk of injury from falling through open windows** • Always use stable step ladders. • Protect yourself against falling out of windows. • Do not steady yourself or hold on to the opened sash.
	**Risk of injury or damage from pressing the sash against the reveal** • Do not press the sash against the window reveal.
	**Risk of injury from trapping parts of the body between the sash and the frame** • Do not insert obstructions into the opening between sash and frame.
	**Risk of injury and material damage from overloading the sash** • Do not overload the sash.
	**Risk of injury from the effect of wind** • Prevent wind from acting on the open sash. • During wind/drafts, close and lock windows.

Certificates

Certificate ISO 9001:2015

CERTIFICATE

No. 3800266

LL-C Certification

This is to certify that the Quality Management System of the company

AXOR

Limited Liability Company "AXOR INDUSTRY"
Pratsi av. 32
49041 Dnipro
Ukraine

has been assessed and found to be in compliance with the Standard

ISO 9001:2015

applicable to

Manufacture and selling of turn, tilt and tilt & turn hardware for windows and balcony doors.

The certificate has been issued under No. **3800266** for the registration period from 22 April 2024 to 21 April 2027.
The first certificate date of issue is 22 April 2024.

Mit diesem Zertifikat wird bescheinigt, dass das benannte Bauprodukt den Anforderungen des zugrundeliegenden ift-Zertifizierungsprogramms in der aktuellen Fassung entspricht.
- Erstellung von Produktfamilien des aufgeführten Bauproduktes und Typprüfung durch eine akkreditierte Prüfstelle nach EN 13126-8:2017 unter Berücksichtigung der Anwendungsdiagramme
- Einführung und Aufrechterhaltung einer werkseigenen Produktionskontrolle durch den Hersteller
- Erstinspektion des Werkes und der werkseigenen Produktionskontrolle durch ift-Zert
- kontinuierliche Fremdüberwachung des Werkes und der werkseigenen Produktionskontrolle durch ift-Zert

Dieses Zertifikat wurde erstmals am 21.05.2014 ausgestellt. Die aktuelle Version gilt bis zum 20.05.2029, wenn sich zwischenzeitlich die Festlegungen in der oben angeführten technischen Spezifikation oder die Herstellbedingungen im Werk oder in der werkseigenen Produktionskontrolle selbst nicht wesentlich verändert haben.
Das Zertifikat darf nur unverändert vervielfältigt werden. Alle Änderungen der Voraussetzungen für die Zertifizierung sind ift-Zert mit den erforderlichen Nachweisen unverzüglich schriftlich anzuzeigen.
Das Unternehmen ist berechtigt, das benannte Bauprodukt gemäß der ift-Zeichensatzung mit dem „ift-zertifiziert"-Zeichen zu kennzeichnen.
Dieses Zertifikat enthält 2 Anlage/n.

This certificate attests that the building product mentioned fulfils the requirements of the underlying ift-certification scheme in its current version.
- compilation of product families of the building product listed and type-testing by an accredited testing body as per EN 13126-8:2017 based on the application diagrams
- implementation and maintenance of a factory production control by the manufacturer
- initial inspection of the production site and the factory production control by ift-Cert
- continuous third-party control of the production site and the factory production control by ift-Cert

This certificate was first issued on 21.05.2014. The current version is valid until 20.05.2029, as long as neither the conditions laid down in the technical specification listed above nor the manufacturing conditions in the production site nor the factory production control itself are modified significantly.
The reproduction of the certificate without any change from the original is permitted. Any changes to the prerequisites applicable to certification shall be immediately communicated in writing to ift-Cert accompanied by the necessary evidence.
The company is authorized to affix the "ift-certified"-mark to the building product mentioned according to the ift-rules on the use of the "ift-certified"-mark.
This certificate contains 2 annexes.

Narrow corner transmission

Narrow corner transmission, 1 ML, 50x150

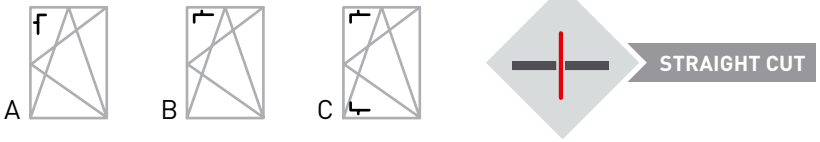

Narrow corner transmission, 1 MR, 50x150

- not intended for double-sash windows;
- not intended for RC security level.

In order to use the narrow corner transmission according to scheme B the distance from the bottom of the fitting groove to the handle axis should be 225 mm, i.e. a hole for handle on gear K1001-02-N03 is displaced from the center of the sash in application range of the sash's height 370-450 mm.

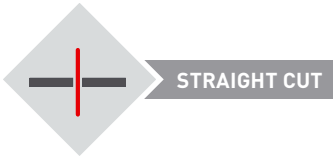

Description	Side opening	Application range						Part No.
		SRW (mm)	SRH (mm)

Narrow corner transmission

Narrow corner transmission, 1 ML, 15×115

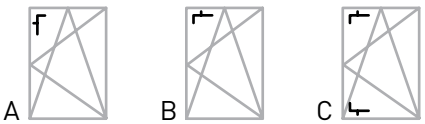

Narrow corner transmission, 1 MR, 115×15

- not intended for double-sash windows

In order to use the narrow corner transmission according to scheme B the distance from the bottom of the fitting groove to the handle axis should be 225 mm, i.e. a hole for handle on gear K1001-02-N03 is displaced from the center of the sash in application range of the sash's height 370-450 mm.

Information for an adjustment of jigs constant gear

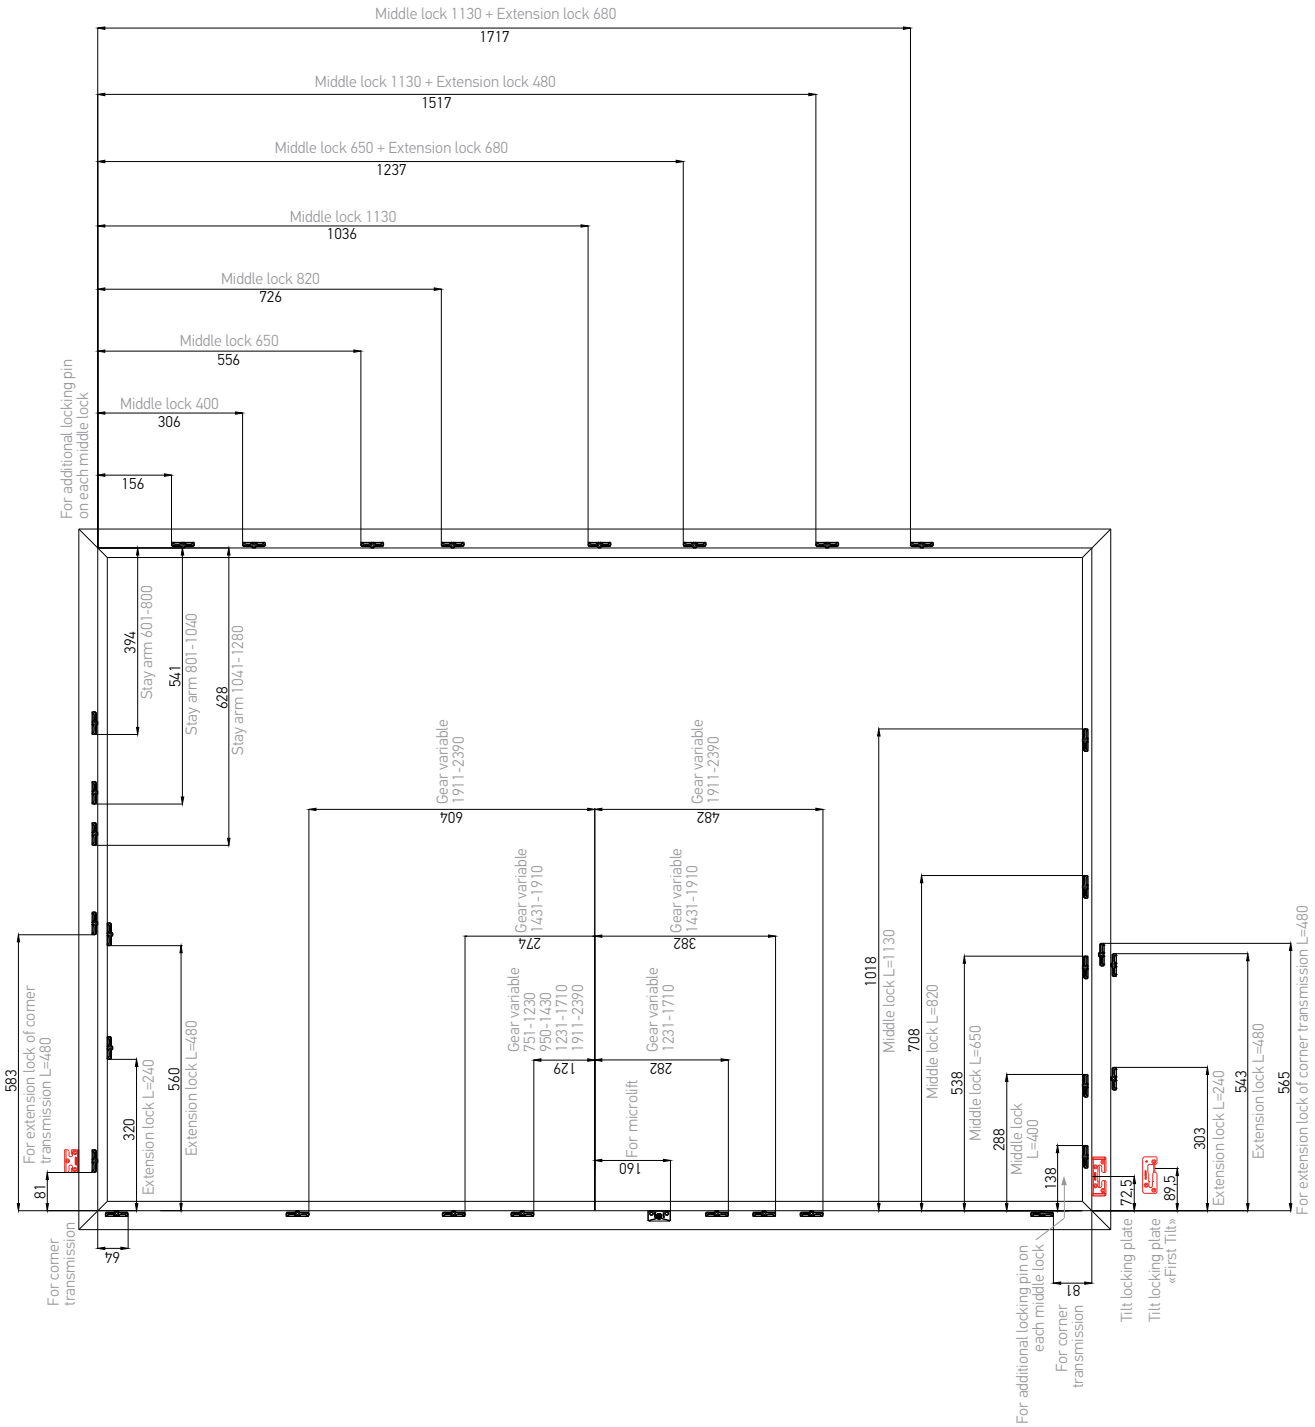

All dimensions are approximate and are subject to verification during production start-up.

Locking plate jigs

№	Description	Designation	Part No.
1	Telescopic jig GV 2	For tilt-and-turn gear 5, 6. The handle is positioned in center.	A7024-02-N00
2	Telescopic jig GV 1	For tilt-and-turn gear 2,3,4. The handle is positioned in center.	A7024-01-N00
3	Linear jig MLV	For all vertical middle locks.	A7026-00-N00
4	Linear jig MLH	For all horizontal middle locks.	A7028-00-N00
5	Linear jig MLEV + MLV	For all vertical middle lock extensions + for all vertical middle locks (set).	A7027-00-N00
6	Linear jig MLMLEV	For all vertical middle locks, all middle lock extensisons.	A7231-00-N00
7	Linear jig SA	For stay-arms of all sizes.	A7032-00-N00
8	Linear jig CTCP 1	For corner transmission with vertical locking pin.	A7025-00-N00
9	Linear jig CG	For constant tilt & turn gear 3, 4, 5, 6, 7.	A7065-01-N00
10	Linear jig CG	For constant tilt & turn gear 8, 9, 10.	A7065-02-N00
11	Linear jig EL-T	For extension locks with catcher, top.	A7229-00-N00
12	Linear jig EL-B	For extension locks with catcher, bottom.	A7230-00-N00
13	Striker plate template for sash lifter	For extension locks with lifters	A7257-00-N03

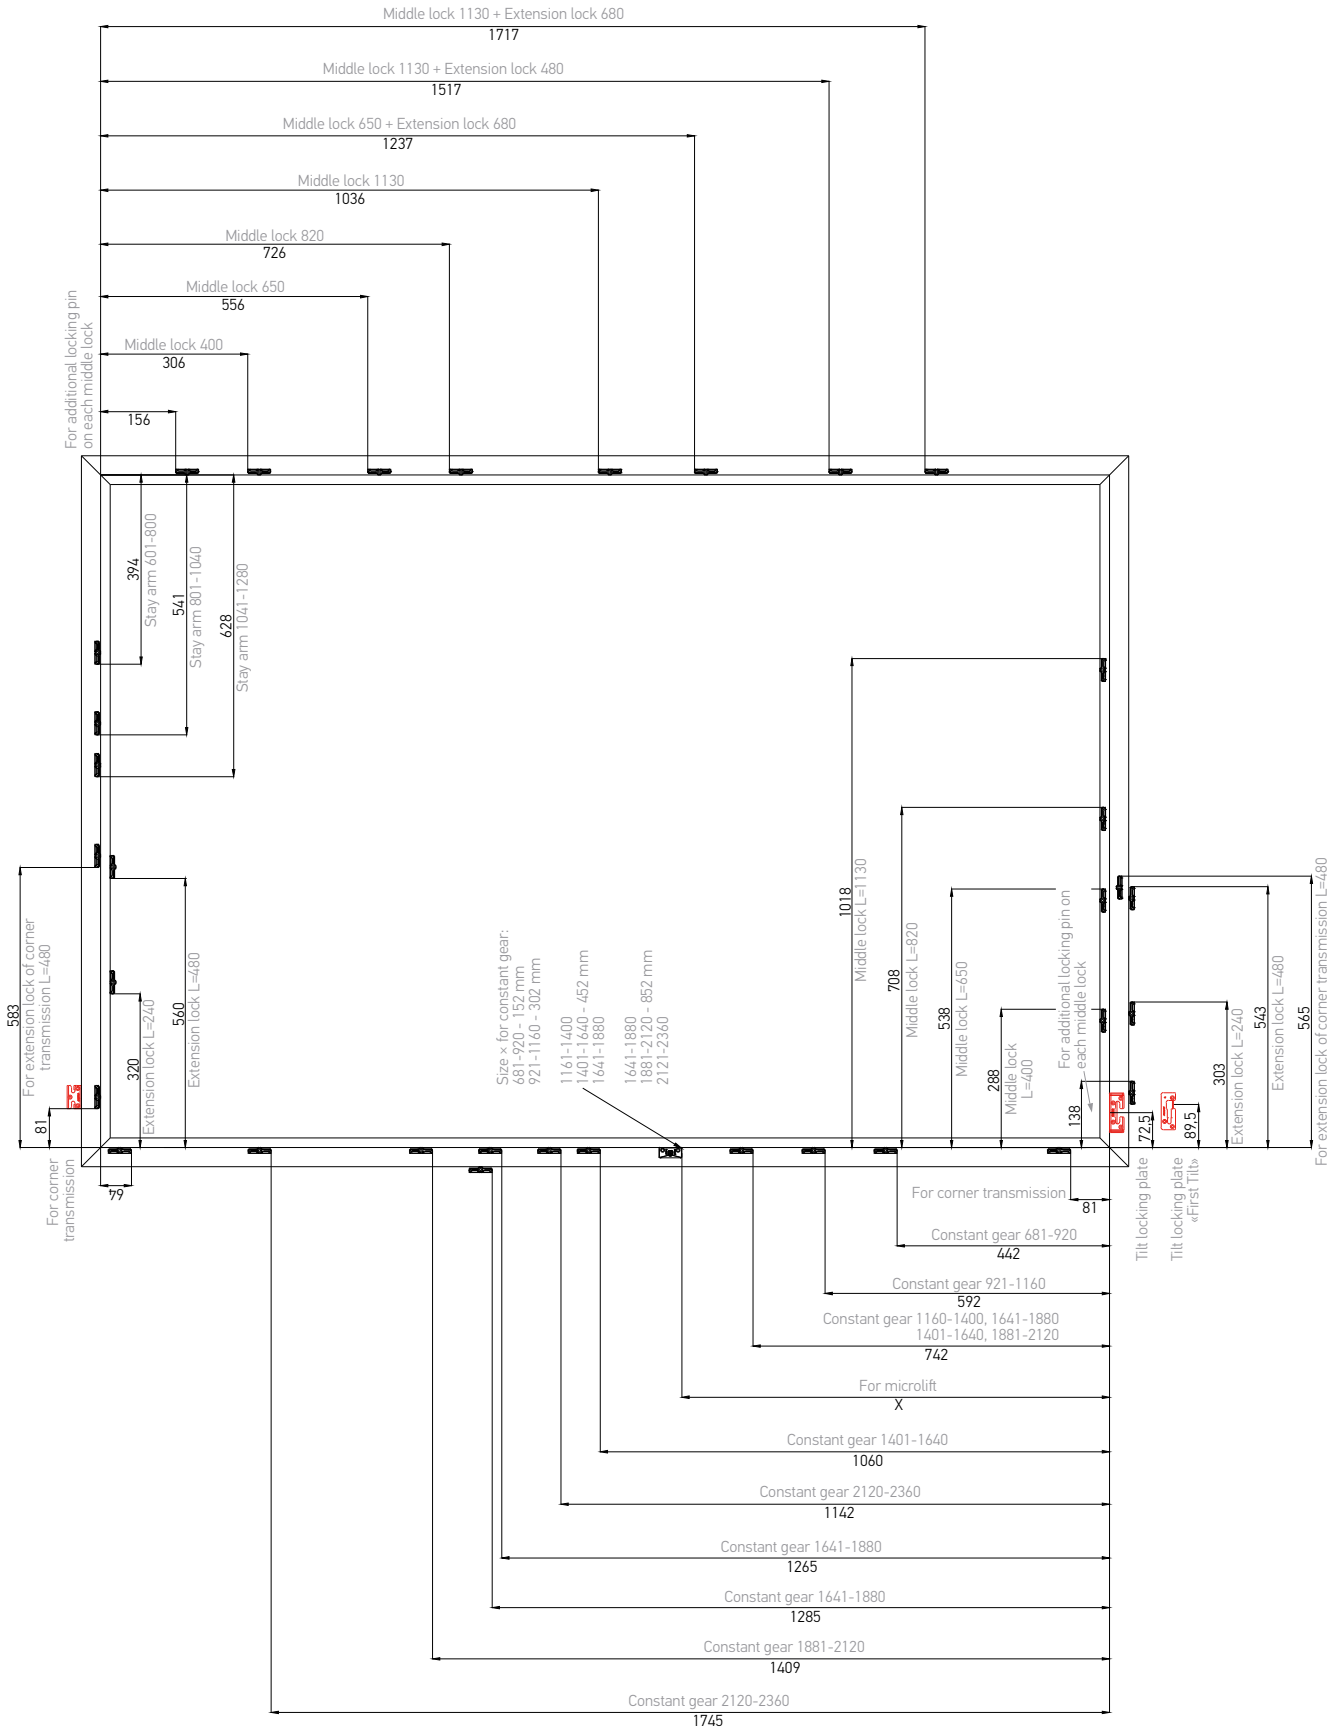

Installation of frame hardware components

Installation of frame hardware components

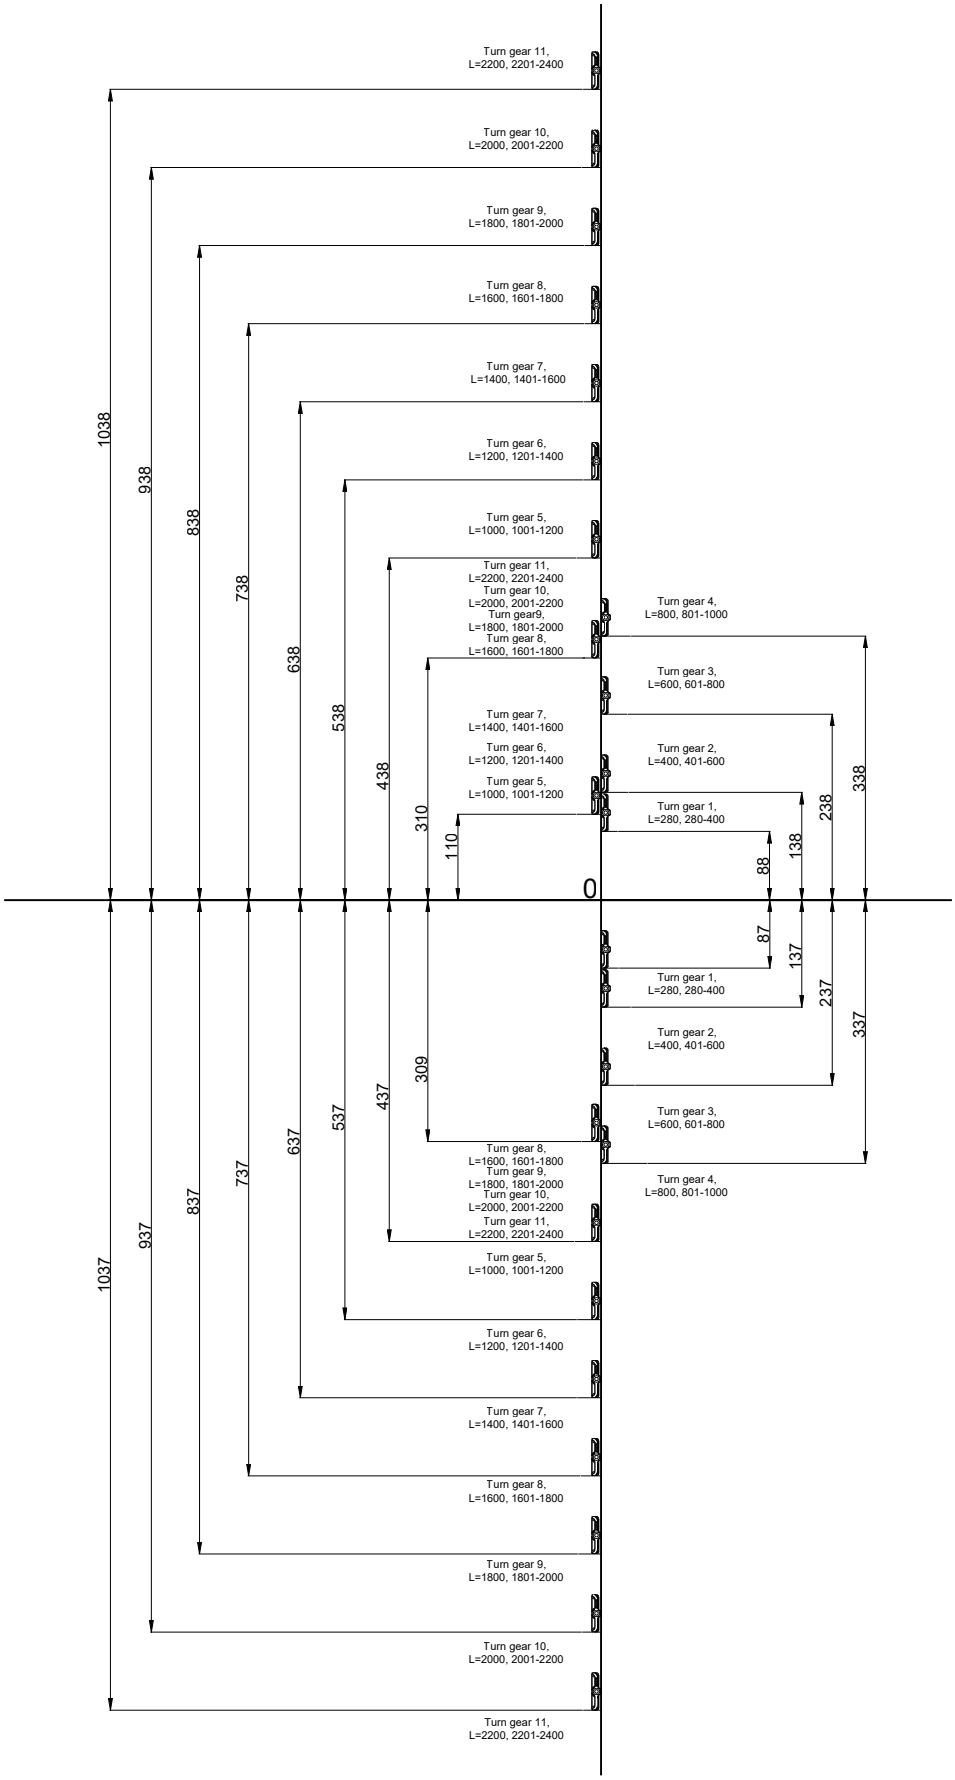

Installation of frame hardware components

Installation of frame hardware components using a constant gears

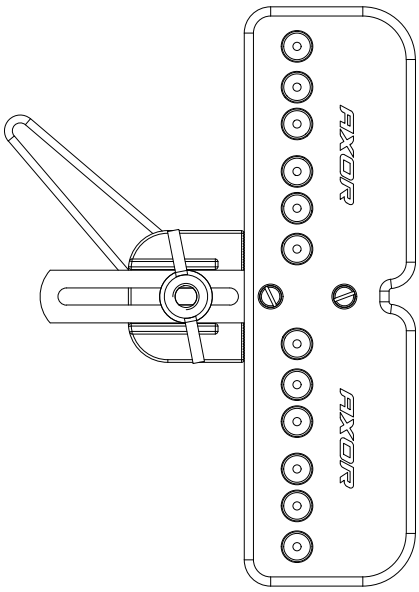

Location of locking plates

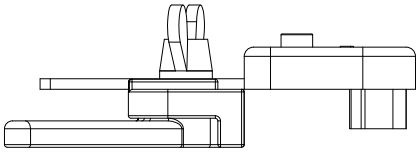

Location of locking plates with using of single turn gears, backset of ones is 15 mm.

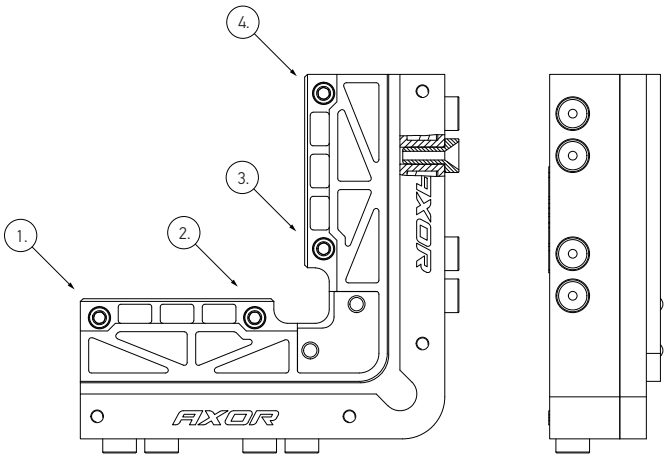

Jigs for hinges

Drilling jig for frame hinges

Drilling jig for sash hinges

1-4. Adjustment screws use for jig fixation in sash groove.

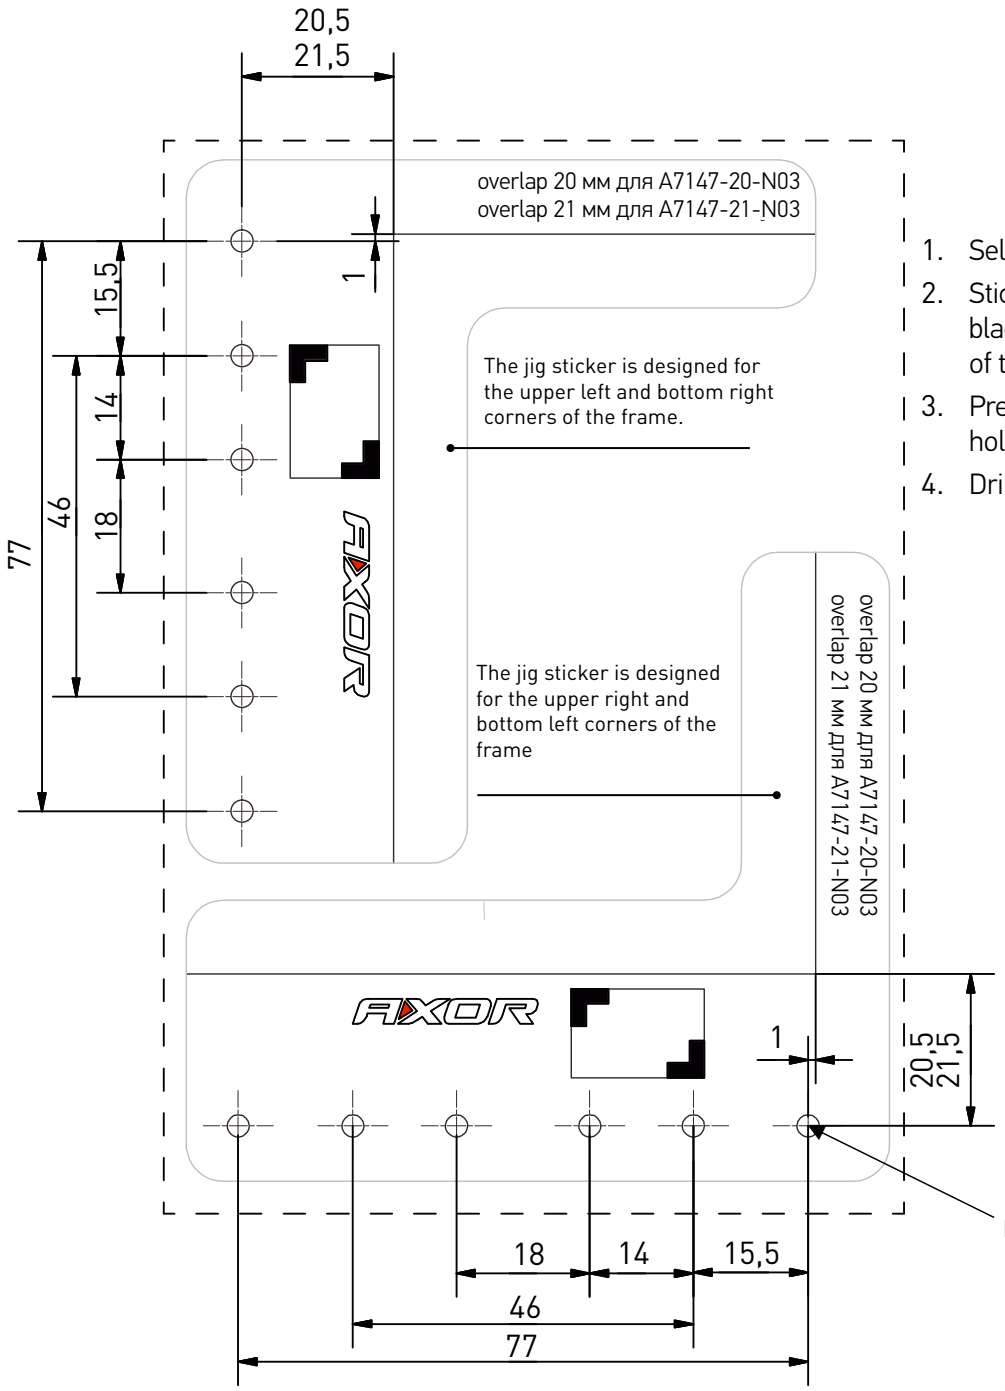

Adjustment plate

Description	Profile	Designation	Tool		Part No.
Drilling jig for frame hinges	12/20	For drilling holes for top and bottom frame hinges	drill Ø3	50	A7002-00-N09
Drilling jig for frame hinges	12/21	For drilling holes for top and bottom frame hinges	drill Ø3	50	A7002-20-N09
Drilling jig for sash hinges	12/20-13; 12/20-9	For drilling holes for bottom sash hinge	drill Ø3	80	A7003-00-N09
Drilling jig for sash hinges	12/21-13; 12/21-9	For drilling holes for bottom sash hinge	drill Ø3	80	A7003-20-N09
Adjustment plate 0,5 mm	–	For sash jig adjustment	–	1	10073-05-N08
Adjustment plate 0,7 mm	–	For sash jig adjustment	–	1	10073-07-N08
Adjustment plate 1 mm	–	For sash jig adjustment	–	1	10073-10-N08

Drilling jig stickers for frame hinges

Drilling jig stickers for frame hinges

1. Select the desired sticker.
2. Stick it on the frame so that the black solid line repeats the fold of the frame.
3. Press the places for drilling holes.
4. Drill the necessary holes.

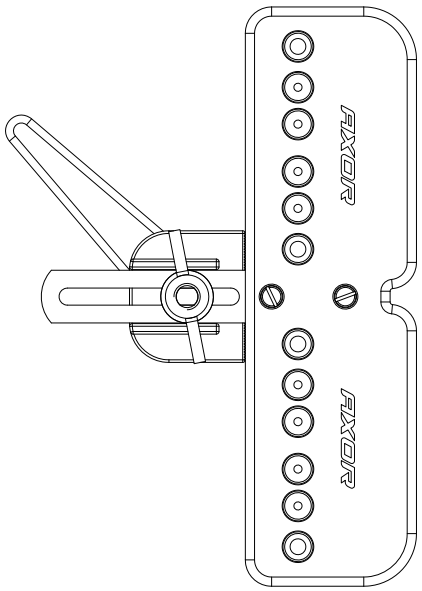

- only for visible hinges weighing up to100 kg

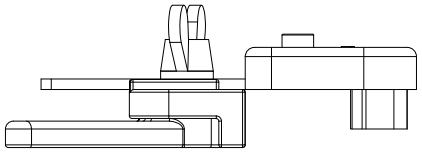

- is a disposable jig for drilling holes in the frame, similar to A7002-20-N09

Description	Size	Part No.
Drilling jig for frame hinges, 20 mm	20	A7147-20-N03
Drilling jig for frame hinges, 21 mm	21	A7147-21-N03

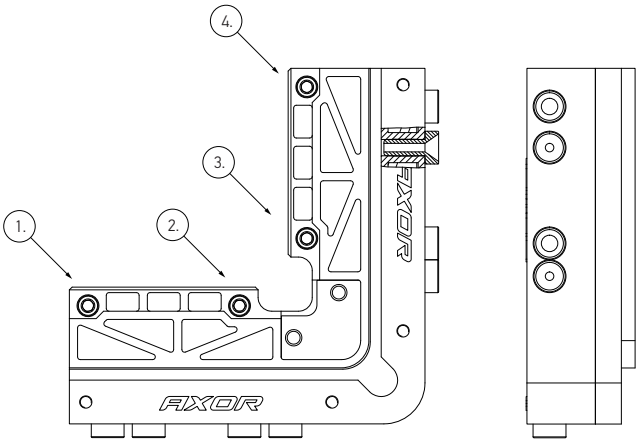

Jigs for hinges 130 kg

Drilling jig for frame hinges 130 kg

Drilling jig for sash hinges 130 kg

1-4. Adjustment screws use for jig fixation in sash groove.

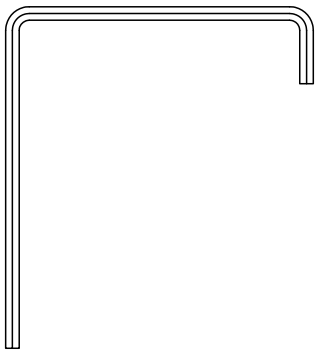

Adjustment plate

Installation recommendations
Adjustment

Sash installation

The pin should be installed only when the sash has been closed and the handle is in "Tilt" position.
Caution!
After the pin has been installed to rotate the handle to "Closed" position.

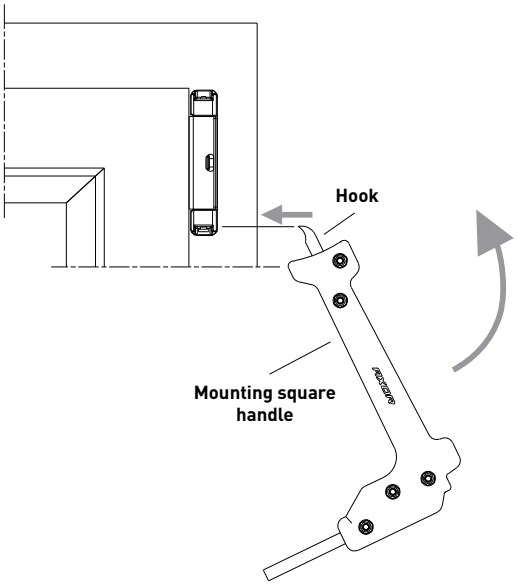

Pin installation

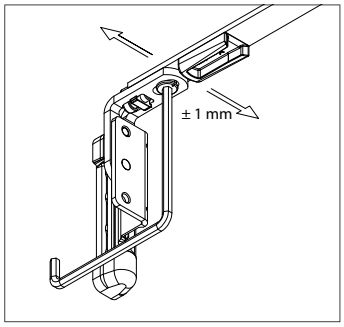

1. Insert the pin into appropriate hole by hand.
2. Push the pin into final position with mounting handle.

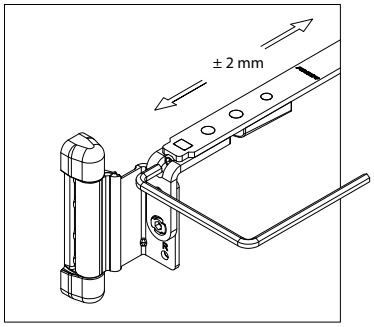

Sash removing

The pin should be removed only when the window has been closed and the handle is in "Tilted" position. Then, after the pin has been removed to turn the handle to "Open" position and to remove the sash.

Installation recommendations

For hinge installation it is recommended to drill 3-mm hole in plastic and reinforcement profile, then to screw the hinge with screws without drill-bit.

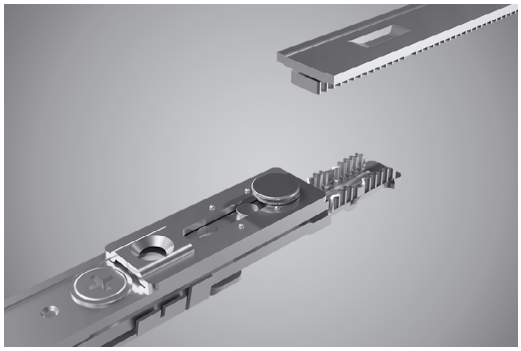

For normal hinge load of 100/130 kg, it is NECESSARY to fix the hinge that ALL screws DIN 7982 3.9 × 38 mm (4 pcs) go into a reinforcing profile of a frame. If only 3 self-tapping screws go into the reinforcing profile of the frame, the weight of a sash is limited up to 80 kg, if only two self-tapping screws the weight of the sash is limited up to 70 kg.
