## KOMFORT LINE K-3

Beschläge für Fenster und Türen

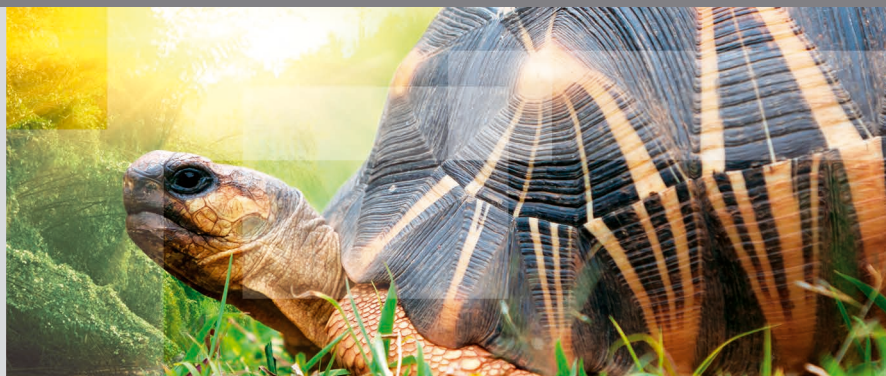

### USABILITY AND SMOOTH OPERATION

- Smooth operation of all hardware elements
- Quiet operation
- Appropriate force for tight closing of the window

### LONG-TERM AND RELIABLE SERVICE

- EU standards of quality EN and DIN
- Resistance to deformation even at maximum load at the window sash
- Reliable service of hardware

### TIGHTNESS ALONG THE ENTIRE PERIMETER

- Reliable protection against external noise
- Prevention of heat loss in cold season
- Constant clamping force during entire service life

Komfort Line K-3 is a guarantee of reliable operation during entire life of window-and-door assemblies.

Engineering solutions have allowed our designers to create hardware, which provides high functionality, ergonomic exploitation and security for an end user.

## PRODUCTION IN COMPLIANCE WITH EU STANDARDS

AXOR INDUSTRY is an international company, which is specialized in production of hardware for PVC windows and doors.

Our factory located in the city of Dnepropetrovsk is an up-to-date fullcycle manufacturing complex No1 in Ukraine and one of the leading enterprises in this sector. AXOR INDUSTRY is equipped with modern machinery for manufacturing of high quality products using cutting-edge international technologies. All processes at the factory are automated and arranged taking into account requirements to environmental protection, meet international standards and are certified by the leading industry research center IFT Rosenheim (Germany).

The key priority for us is high quality of products. TM AXOR hardware meets all EU standards and was successfully certified by the institute IFT Rosenheim as well as for compliance to requirements of the Ukrainian State Standard (DSTU). Results of testing have showed that TM AXOR hardware guarantees more than 30 000 full tilt and turn cycles that is equivalent to 15 years of a window dynamic exploitation.

Our Komfort Line K-3 is a model of standard-class hardware. Alongside with high quality and well functioning of all mechanisms, Komfort Line K-3 hardware offers several additional options, which increase considerably security and comfort of your house.

We pay special attention to high operating characteristics of TM AXOR hardware. Komfort Line K-3 hardware coating has the highest 5 grade of corrosion resistance according to results of testing in a salt spray chamber.

That's why, if you think much of quality and comfort, then choose Komfort Line K-3.

## CERTIFIED QUALITY
