

Sash position control

A wrong operation safety device does not allow the handle to be turned while the window is in an opened position which prevents false sash opening and provides for the smooth window operation.

Basic security level

Standard configuration already includes two positions with the burglar retardant elements which increases break in properties of the window.

AXOR INDUSTRY is the leading manufacturer of hardware for PVC constructions in Ukraine.

The plant is equipped with up-to-date high-tech equipment, which provides highly automatic production and complies with European standards.

Quality control of products is realized at all steps of manufacturing with subsequent testing in our own certificated laboratory.

SMART LINE S+ hardware is a concept-based solution of the company AXOR, which includes safety and reliable operation. The key feature of a newlydesigned product is its standard configuration, which incorporates a wrong operation safety device, microventilation, optimal number of clamping elements and two points of burglary protection.

SMART LINE **S+**

Security and comfort
 in one solution

STANDARD CONFIGURATION

Microventilation

Microventilation allows you to open a window sash slightly at 6 mm for the room ventilation without considerable heat losses.

Protection of your house

Burglarproof locking elements complicate housebreaking by illegal intruders that is especially important for private residences as well as apartments located on the ground or the top floor of high buildings.

ADDITIONAL OPTIONS

Controllable level of ventilation

Step-by-step ventilation allows you to control level of a sash opening for the room ventilation with different intensity. Range of opening for step-by-step ventilation varies from 12 to 20 mm.

Child security lock

Special child security lock that blocks the window and allows only turning it to the ventilation mode.

ADDITIONAL OPTIONS

Advanced security level

Hardware that features only mushroom pins allows for the significant increase of the security level via simply changing standard locking plates for the safety locking plates.

Decor overlay

SMART LINE S+ hardware can be used with a variety of the window lamination options due to the assortment of the decor hinges overlay.
